Summary

local.ly Mission Statement

We want to empower people to shop locally with the confidence that their values are being met.

Selected Interface

- **Dynamic Cards**
 - Digital business cards you can share
- **Value-Driven Search**
 - Advanced search centered on values and trust

Selected Interface

- **Dynamic Cards**

- More playful & fun
- Analogous to real world business cards
- Cards could embody relationships
- Easy integration with other ideas

dynamic cards, mostly
Kind of like re-imagined digital business cards you can collect

Low-Fi Prototype

- Designed in Balsamiq
- Wireframed in Figma
- Phone Interface
- Tap / Swipe Interface with some typing

Task #1

Buy value-driven
product(s) locally

Task #1 - Buy value-driven product(s) locally

Task #2

Build relationships
with local businesses

Task #2 - Build relationship with local businesses

Task #3

Discover new
businesses with
similar values

Task #3 - Discover new businesses with similar values

Task #3.5

Share businesses
with friends

Task #3.5 - Share businesses with friends

Results - Positives

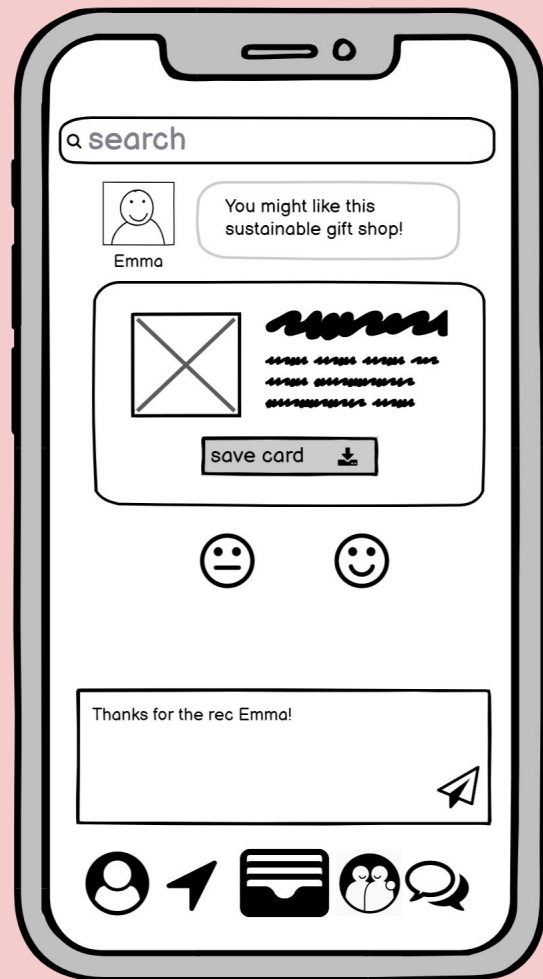

- Representation of a business as a digital card was well-understood and positively received
- Sharing a card to send your friends information was viewed as intuitive
- Social features “made sense” and were well-received
- Search on every screen was viewed positively
 - “At any given moment, I might want to search for something else”

Results - Negatives

- Representation of rewards was mixed with one person initially believing it was a “sketchy internet ad”
- Unclear what caused upgrade from silver to gold card status + mixed reaction
- “Build a relationship” caused users to go down the wrong task flow because of the icon of two friends
- Feedback smiley faces caused confusion

Suggested UI Changes

- Update Home button (icon and position)
- Remove recommendation feedback option (smiley faces)
- Update rewards bar into punch holes or stamps to indicate purchase history
- Make card status (Silver, Gold, etc.) and associated benefits clearer
- Delineate relationships with friends vs. relationships with businesses more cleanly

Summary

- Users found the digital business card concept and sharing them fun and intuitive
- Searching and value filters were seen as straightforward
- The process of earning rewards and building a relationship with a business needs streamlining
- Navigation menu and feedback icons were confusing

QUESTIONS?

Appendix

Task Simplification + Process

Task #1: Buy value-driven product(s) locally.

Task #2: Build relationship with local businesses

Task #3: Discover new businesses with similar values

Task #3.5: Share business cards with friends
